CARRIER OBJECTIVES

As a dedicated Bachelor of Engineering (BE) student specializing in Computer Science, I am seeking a full stack developer position where I can leverage my technical skills and passion for creating impactful web applications. As a budding data analyst I possess expertise in Power BI, Tableau, Excel, and SQL, aiming to uncover actionable insights to support informed decision-making. I pride myself on being self-motivated and a smart worker, with a focus on effective communication and teamwork. My strengths lie in my ability to navigate the development lifecycle efficiently while delivering user-centric designs. I possess proficiency in various technologies, including Python, Java (basics), Django, database management, web development, Talend Integration and Salesforce administration. I value a healthy working environment where I can collaborate with senior professionals, gain exposure to client interactions, and pursue continuous learning and growth.

Adaptable and committed, I am focused on achieving excellent results, regardless of the challenges faced.

EDUCATION

Bachelor of engineering in Computer Science Yenepoya Institute of Technology	Mudbidri,Karnataka Expected Graduation: 2025 CGPA : 9.32
Higher Secondary Certificate (HSC) Government Higher Secondary School Thottada	Kannur,Kerala Completed: 2021 Percentage : 89%
Secondary School Leaving Certificate (SSLC) Kadambur Higher Secondary School	Kannur,Kerala Completed: 2019 Percentage : 86%

CO-CURRICULAR ACTIVITIES

CERTIFICATIONS

- Learn Programming with Java, Infosys .
- Foundation of Cyber Security, Google.
- Data Analytics fundamentals ,AWS.
- Postman Classroom Program ,Postman.
- Active Listening Skills For Students ,Infosys
- Project-Based Learning -Build an AI Text Summarizer App ,Postman

INTERSHIPS

Android App Development Intern

At Genesis Training, Bengaluru

Genesis is an application development platform for the financial markets. It empowers professional developers to build high-performance, resilient and secure applications at speed. Designed and developed more than 4 mobile apps live on play store.Worked with the team of 4 members and provided end-to-end solutions.

Full Stack Developer Intern

At Invenetron Technologies and Buisness Solutions LLP, Bengaluru

During my internship I gained hands-on experience in building and maintaining web applications by working across both the front-end and back-end.that ensuring optimal performance across various devices and browsers Throughout the internship, I collaborated closely with a cross-functional team, participated in code reviews.

Salesforce Administrator Intern

At SmartBridge, Hyderabad

I gained extensive experience in managing and optimizing the Salesforce platform to support business processes. I was responsible for configuring and customizing Salesforce to meet the organization's needs, including creating and managing user accounts, setting up security protocols, and developing custom reports and dashboards to provide actionable insights.

Python Developer Intern

At TechOctanet Services Private Limited, Bengaluru

I developed robust software solutions by leveraging my expertise in Python programming. As part of my internship, I was tasked with developing an ATM machine website using Python. and involved creating a basic ATM machine with essential functions I worked with libraries and framework such as Django to build web applications ensuring seamless integration with databases like MySQL/SQL LITE.

Data Engineering Intern

At National Skill Development Corporation(NSDC), New Delhi

During my NSDC internship in Data Engineering, I developed efficient data pipelines and performed data migrations using Talend Studio. I worked extensively with components like tMap, tLogRow, and REST API integrations to extract and transform data. Additionally, I created fact tables, explored advanced visualizations in Power BI, and optimized database operations using SQL. This experience enhanced my skills in data integration, analysis, and leveraging modern tools for data engineering tasks.

PROJECTS

Music player Clone, HTML,CSS,JS

November 2023

- Built a fully functional music player using HTML, CSS, and JavaScript, featuring play, pause, delivering a seamless and responsive audio playback experience
- Designed and integrated a custom audio visualizer using JavaScript, providing users with a visually engaging experience that synchronized with the music playback.

Department Management system, HTML, CSS,JS,Mongoddb,Node JS

March2023

- Designed and implemented a MongoDB-based database for a department system.
- Allowing students to securely retrieve their Internal Assessment (IA) marks and where faculty can update their marks. Optimized data retrieval and update operations using MongoDB's flexible document structure

Motor Service at home, Python,Django, HTML,CSS,JS

May 2024

- Developed a full-stack web application using Django and MySQL that allows users to schedule motor servicing appointments at their preferred time and location.
- Implemented robust backend logic using Django, handling customer data, and scheduling with MySQL

Smart village, Computer Graphics

May 2024

- Created a 2D simulation of a smart village using OpenGL in DevC++.
- Featuring interactive elements such as houses, roads, trees, and community buildings, providing a visual representation of a modern, tech-enabled rural environment.
- Allow users to explore the village, view structures, and understand the smart village layout and functions.

College Management system, SQL,Talend Studio,PowerBi ,

November 2024

- Developed a College Management System using SQL Plus, SQL Developer, Tableau, and Talend Studio, performing data migrations with Talend for seamless data integration.
- Designed relational databases for efficient management of student, course, and faculty data, while creating interactive Tableau dashboards to visualize key metrics like enrollment trends and academic performance.

Non-Invasive Affordable Breath Biopsy Device,IoT and Machine Learning

Ongoing

- Developing a non-invasive, affordable breath biopsy device for early disease detection, including cancer, asthma, and diabetes, with a focus on making it a cost-effective alternative to traditional methods.
- Integrating sensors (MOS for VOCs, NDIR for CO₂/methane, electrochemical for NO/CO/H₂) and using IoT for real-time data collection, while applying machine learning for pattern recognition to detect health anomalies..

TECHNICAL EVENTS AND ENGAGEMENTS

- **IoT and Embedded Systems:** Completed a 5-day course on IoT and Embedded Systems at NIT Karnataka. Explored Arduino projects, IoT app development, and gained insights into iFog simulation
- **National level technical fest “YENTECHMANIA”:** Participated in Innolauch Startup Pitch in National level technical fest yentechmania where I showcased my skills by presenting an innovative idea.
- **UNSCRAMBLE 2.0 National level Hackathon:** Participated in the first round of a National-level hackathon at Yenepoya Institute of Technology, focusing on anomaly detection using machine learning. Worked with a team to design algorithms, improving data analysis and model evaluation skills.

EXTRA CURRICULAR ACTIVITIES

- **IEEE Member :** As an active member of the IEEE (Institute of Electrical and Electronics Engineers), I have participated in numerous technical workshops, seminars, and conferences, enhancing my knowledge and skills in various engineering domains
- **Embedded Club Member:** As a dedicated member of the Embedded Club, I have actively engaged in hands-on projects involving microcontrollers and embedded systems

SKILLS

Technical Skills: HTML, CSS, JS, Python, Java,Bootstrap,ETL,data transformation,data connectivity

Industry Specific Skills: Database management , Front-End Development ,Backend Development,Data analysis

Soft Skills: Effective Communication, Time Management, Team Work, Project Management, Creativity

Tools: MongoDB, MySQL, Oracle, VS Code, Django ,SQL Developer,PowerBi,Tableau,SQL plus,Talend

ACHEIVEMENTS

- Startup Mahakumbh Bharat Innovates, New Delhi📍
